

# Enhancing your productivity

Your global partner for accurate measurements and expert support in Food and Beverage automation

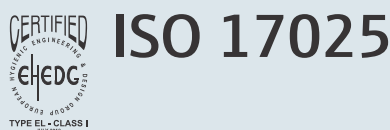

**Endress+Hauser** applies decades of application know-how to help our customers increase up-time and production repeatability while minimizing product loss.

**Get it right the first time and make your safe choice:**

**Constant food quality & compliance**  
Meet global hygiene regulations for food safety with robust proven in-use products. Benefit from traceable and accredited calibration services at your facility or in our lab.

**An expert partner for reliable solutions**  
Receive quality guidance of the optimum-fit products for your specific needs from a network of global and local experts who stay by your side through the entire life cycle ensuring high plant availability.

**Resources savings**  
Get real-time, accurate data from your critical process points and save money on raw materials, water, energy and labor, without interruption in your production.

For decades, global and local producers, as well as plant and machine builders have profited from our support and innovations designed to increase productivity and reduce costs. From hygiene regulations and food safety to the basic demands of reliability and uptime, high quality food & beverage producers benefit from our experience in more than 100 countries. Reliable instruments and systems combined with services addressing customer needs help in overcoming challenges.

## Supporting your audits and maintaining product quality

Endress+Hauser's Services portfolio is comprised of a broad selection of services, solutions and tools for you to optimize your plant's performance. Our wide services portfolio includes:

- Industrial support services
- Diagnostics and device repair services
- Industrial engineering services
- Commissioning services
- Calibration services
- Maintenance services
- Industrial training

## Looking after your business – we care!

Because we care, we add value to your business at every phase of the life cycle. We are by your side to support, to service and to optimize your processes.

## Application expertise – we understand your business

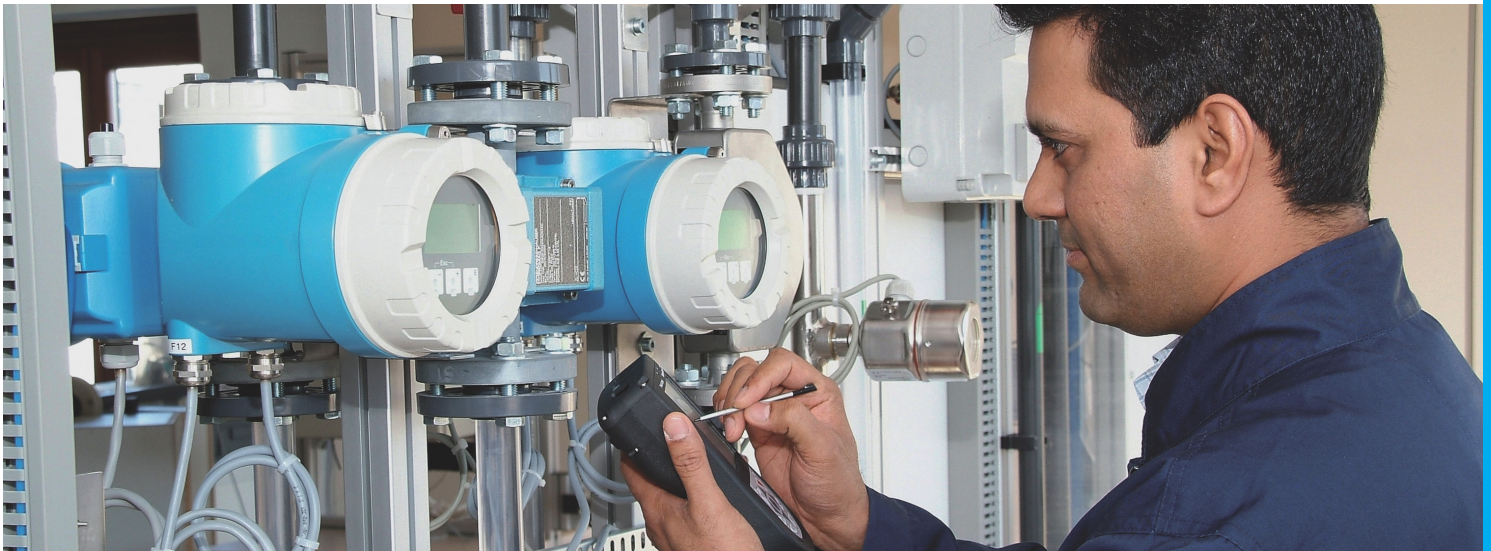

Because instrumentation is vital for your process, we capitalize on decades of experience in the very varied applications in your industry. Our network of experts is perfectly positioned to provide your business with the right support.

## Tailor-made solutions

By your side at every step along the way, we are firmly committed to providing the right service to fulfill all your needs. Whatever you require, we have the service solution.

## People qualified to work on your site

Our service teams are trained and equipped to intervene on your site in accordance with your specific health & safety requirements.

### Maintaining stronger plant performance through harmonized calibration services

Your competitive edge depends on maintaining and continuously improving production efficiency. Regular calibration is essential to keep the instrumentation controlling your quality-critical processes in spec.

Endress+Hauser provides timely, traceable, and cost-effective services that are accompanied by clear and concise calibration certificates. From in-situ testing to fully accredited laboratory calibration, we calibrate all field instruments installed in your plant and not just Endress+Hauser devices alone.

### Start-up with Endress+Hauser

Get your process up and running on time and on budget with Endress+Hauser's commissioning services. When you select the Start-Up package at the time of ordering instruments, you get a worry free additional 12 months and you can get the instrument commissioned by a qualified Endress+Hauser engineer at no additional cost!

### The right balance of maintenance

Installed Base Analysis (IBA) allows you to make the right decisions in terms of focusing the needed maintenance efforts according to your available resources and production requirements.

### Flowmeter calibration

On-site and off-site calibrations are executed with our mobile flow rig and Certificates generated in line and traceable with NABL ISO/ EN 17025.

### Maintenance services

- Liquid analyzer calibrations are traceable to NIST standards
- Pressure & temperature calibration are traceable to NABL standards
- Verification services for Endress+Hauser make instruments.

Since time, human resources and specific skills become critical factors when a project is nearing completion, utilizing services from Endress+Hauser bring important benefits.

The standard outcome of Installed Base Analysis is a clear and health view of your instruments installed in a process, helping you to plan proactive maintenance.
